

Multiplot display

Generate 4 box plots and display them on one page.

Note: file_name variable should point to the location of cuny9.csv file on your machine

```
library("ggplot2", lib.loc="C:/R/R-3.1.0/library")
```

```
## Warning: package 'ggplot2' was built under R version 3.1.1
```

```
source("http://peterhaschke.com/Code/multiplot.R")
file_name <- "C:\\CUNY\\cuny9.csv"
cuny9 <- read.table(file=file_name, header=TRUE, sep=",")
p1 <- ggplot(cuny9, aes(y=y1,x=x1))+geom_boxplot()
p2 <- ggplot(cuny9, aes(y=y2,x=x2))+geom_boxplot()
p3 <- ggplot(cuny9, aes(y=y3,x=x3))+geom_boxplot()
p4 <- ggplot(cuny9, aes(y=y4,x=x4))+geom_boxplot()
multiplot(p1, p2, p3, p4, cols=2)
```

```
## Loading required package: grid
